

"WITH MONOSUISSE AS A PARTNER, STABILITY IS A GIVEN: WE CAN
FOCUS ON GROWTH AND NEW DEVELOPMENTS"

HOOK & **LOOP**

THE ***HOOK & LOOP***

ONE OF THE BEST CUSTOMIZED YARNS IN ITS CLASS.

WWW.MONOSUISSE.COM

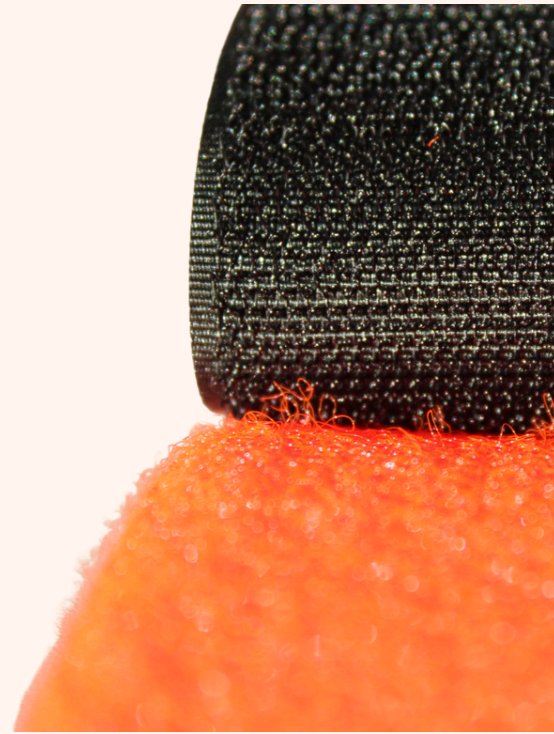

THE *HOOK & LOOP*

ONE OF THE BEST CUSTOMIZED YARNS IN ITS CLASS.

Monosuisse has found its niche for **specialty applications** mostly in (but not limited to) the **automotive** world within a market that is mainly characterized by large volumes of commodity yarns. The monofilaments usually make up the **"hook"** part of the **fastening system** or the **"mushroom" shaped system**.

The main polymers used in this industry are **PA 6.6** (mostly natural color) and **PP** (natural color and black). We offer monofilaments with a round section or a cross-shaped section and are open to **develop other shapes if required**.

Flexibility, reliability and ability to customize can make us stand out among suppliers. Regulatory affairs can ensure (upon request) a range of compliances. Our high-quality laboratory services are available to you for various types of analyses.

FEATURES

- PP and PA 6.6 monofilaments
- Round section monofilaments
- Cross section monofilaments
- Low residual shrinkage

FURTHER SERVICES

- Stock management
- Product customization
- Technical assistance

WHAT ELSE DO WE OFFER?

- RAPIDS
- R&D expertise
- Laboratory services
- Raw material safety stocks

HOW DO WE HELP YOUR BUSINESS?

- Maintain quality
- Offer production flexibility

HOW DO WE SOLVE YOUR PROBLEMS?

- Long term polymer supplier contracts
- Continuous quality improvements
- Minimize adjustments

Monosuisse: "With Monosuisse as a partner, stability is a given: we can focus on growth and new developments"
