

"WE ARE THE SUPPLIER THAT WILL NOT LEAVE YOU STRANDED"

A close-up photograph of a braided metal protective sleeve covering a cable. The sleeve has a complex woven texture. In the background, a multi-colored cable connector is visible, and other cables are partially seen, suggesting an industrial or automotive setting.

PROTECTIVE **SLEEVES**

THE ***PROTECTIVE SLEEVE***

CUSTOMIZED YARNS IN THE BEST QUALITY-PRICE RATIO.

THE *PROTECTIVE SLEEVE*

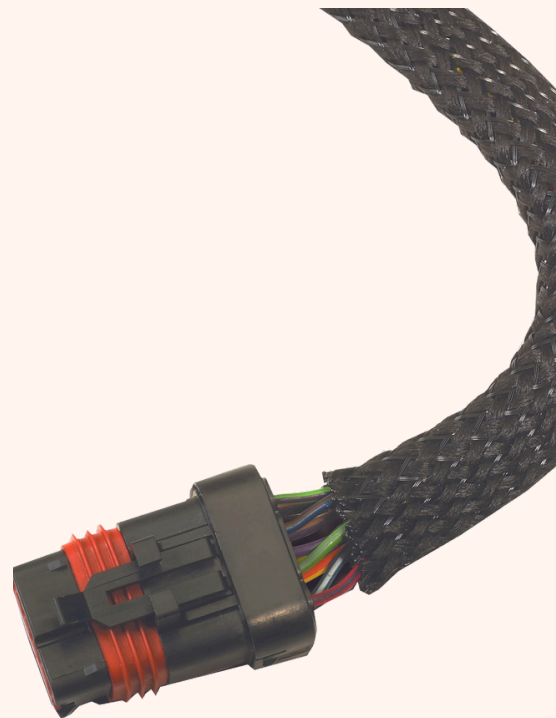

CUSTOMIZED YARNS IN THE BEST QUALITY-PRICE RATIO.

The Protective Sleeves market can be split into two main divisions: **Automotive** (in which we will include any type of means of transportation, such as air, water and land) and **Sanitary** (including hoses for bathroom and kitchen sinks, showers etc.). This market is characterized by an innovative range of **technically demanding products**.

Monosuisse has developed a range of **PET and PA products** for these applications that is in constant evolution as the market's requests change and multiply. The range is **not limited to PET and PA** (mostly PA 6 and 6.6), Monosuisse also has several specialties to choose from such as **PEEK, PVDF, PBT, and more**. In addition, any product can be **customized** according to the customer's needs, after a feasibility study.

Monosuisse's products have a **good breaking load and color retention after aging and a good abrasion resistance**.

Monosuisse's **quality, competitiveness, flexibility and ability to customize** make it the ideal partner in this Market. 100% of our products for this market has been customized.
