

AERONAUTIC FABRICS

INNOVATIVE CUSTOMIZED PRODUCTS IN PREMIUM QUALITY.

When it comes to aeronautics, every gram matters. That's why leading aerospace partners trust our finest high-tenacity multifilament yarns for the most demanding parachuting applications.

We specialize in ultra-light, high-strength, UV resistant yarns such as our PA6.6 17f17, engineered specifically for the lightest and most reliable parachute fabrics. These yarns combine UV resistant breaking strength with unmatched fineness and flexibility, ensuring optimal performance in critical flight and descent conditions.

Whether you're developing ultra-lightweight rescue systems, precision-guided airdrop equipment, or personnel parachutes, our multifilaments offer the consistency, traceability, and quality assurance your mission demands. Thanks to our World Class Quality Management systems and the use of strictly selected raw materials, our dedicated yarn offer allows you to meet stringent aerospace standards.

Features

- ✓ UV protection
- ✓ From 17 dtex to 110 dtex
- ✓ High tenacity
- ✓ From 1dpf up

Additional services

- ✓ Product customization
- ✓ Product development support
- ✓ On-site technical support
- ✓ PPAPs, FMEAs
- ✓ Stock service

What else do we offer?

- ✓ R&D expertise & laboratory services
- ✓ Downstream integration (Twisting)
- ✓ Co-development projects
- ✓ Tailored technical agreements
- ✓ Raw material stewardship

How do we help your business?

- ✓ Comprehensive product selection through versatility and broad assortments
- ✓ Support in planning and forecasting

How do we solve your problems?

- ✓ Support in product design and development
- ✓ Product range stewardship
- ✓ Downstream integration, when it applies
