

FILTRATION
& SIEVING

THE BROADEST PORTFOLIO ON THE MARKET.

You need filtration fabrics that perform with absolute reliability – whether in life-critical medical devices, high-efficiency water treatment systems, or demanding industrial environments. At Monosuisse, we understand that your filters and sieves must deliver consistent, precise, and durable performance. That's why we focus on providing you with the exact yarns you need to make that possible.

We offer a complete and versatile range of monofilament yarns, engineered from high-quality polymers with specific additives, diameters, and properties tailored to your filtration application.

Whether you're developing new solutions for the medical field, optimizing industrial filter media, or ensuring water purity under stringent regulations, Monosuisse provides the material expertise and technical support to help you get there. Every yarn we deliver is a result of close collaboration and a clear understanding of your process, your product, and your customer's expectations.

Features

- ✓ Customized yarn length
- ✓ Specific abrasion behavior if needed
- ✓ Specific modified yarn properties
- ✓ Broad spun-dyed color portfolio
- ✓ Customizable yarn properties
- ✓ Monofilaments with excellent diameter control for precise mesh openings

Additional services

- ✓ Customized high quality products with short lead times
- ✓ Measured yarn length for warp
- ✓ RAPIDS and/or PPAP if needed

What else do we offer?

- ✓ Advanced laboratory services
- ✓ Tailor-made solutions
- ✓ NCAs if needed
- ✓ Stock services
- ✓ R&D collaboration
- ✓ Production flexibility to meet required lead times

How do we help your business?

- ✓ Technical development support
- ✓ Production flexibility to help you meet timely customer demands

How do we solve your problems?

- ✓ By offering exclusive products
- ✓ Building a trusted partnership with the market leading yarn supplier
