

# GEOTEXTILE & AGRICULTURE

# THE HIGHEST KNOW-HOW IN ITS CLASS.

When your products are exposed to harsh outdoor conditions – in the ground, in water, or under constant sunlight – you need materials that last. At Monosuisse, we understand that. That's why manufacturers across industries like geotextiles, agriculture, ropes, nets, and narrow fabrics rely on our lightweight yet highly durable monofilaments made from HDPE and PP. You expect consistent quality, a long service life, and excellent value – and that's exactly what we deliver. Whether you need strength, weather resistance, or precise technical performance, our monofilaments are engineered to meet your exact specifications. We work closely with you to ensure you get the right solution for your application – nothing off the shelf, always made to fit. We also know sustainability matters to you and your customers. That's why we minimize transport emissions by producing near your facilities, recycle and reuse your production waste, and offer bobbins and spools made from recycled polymers.

## Features

- ✓ Very high abrasion resistance
- ✓ Low modulus
- ✓ Lightweight material properties
- ✓ Resistant to extreme environments
- ✓ Standard & custom colors available
- ✓ UV-resistant
- ✓ Flame resistant
- ✓ Working temperature: -50°C to 95°C

## Additional services

- ✓ Customized products
- ✓ Reusable spools - supplier maintained program

## What else do we offer?

- ✓ Technical service
- ✓ R&D expertise
- ✓ RAPIDs
- ✓ Laboratory service

## How do we help your business?

- ✓ Excellent quality due to stable and repetitive production
- ✓ Improved, complex portfolio
- ✓ Short lead time

## How do we solve your problems?

- ✓ Continuous quality improvement
- ✓ Production flexibility to help you meet timely customer demands
