

HOOK &
LOOP

ONE OF THE BEST CUSTOMIZED YARNS IN ITS CLASS.

At Monosuisse, everything starts with you—your application, your challenges, and your performance goals. We specialize in high-quality monofilaments designed not for mass production, but for precision and purpose, especially in demanding sectors like automotive fastening systems.

Whether you need monofilaments for the “hook” part of a closure system or a complex “mushroom”-shaped design, we work closely with you to deliver exactly what fits. We primarily use PA 6.6 and PP, and offer both round and cross-shaped profiles. If your application calls for something different, we’ll develop it together. Need to meet compliance requirements? Our regulatory team can support you. Our in-house lab is at your service for in-depth analysis and quality testing.

With Monosuisse, you’re not just buying a product—you’re gaining a dedicated partner who’s committed to helping you succeed. Let’s talk about what you need—and how we can make it happen, together.

Features

- ✓ PP and PA 6.6 monofilaments
- ✓ Round section monofilaments
- ✓ Low residual shrinkage
- ✓ Shaped including cross section monofilaments

Additional services

- ✓ Stock management
- ✓ Product customization
- ✓ Technical assistance
